Folding arm awnings

www.leiner.de

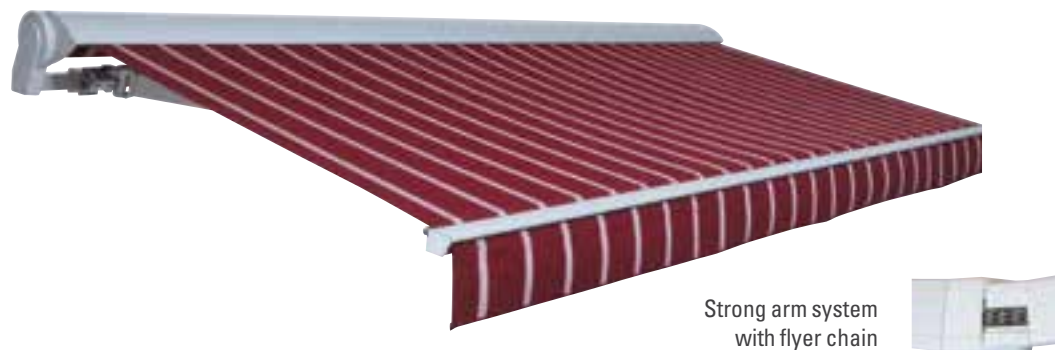

CAPRI

The pure folding arm awning

The CAPRI is a high-quality LEINER folding arm awning. Also with this entry model, great importance has been attached to high quality and long life. The resilient arm system ensures a taut awning fabric. The CAPRI has a huge number of variants. You can, for instance, choose between a visible front profile or one that is concealed by the fabric.

The CAPRI has a projection of up to 4 m and a maximum width of 6 m. Coupled systems are available of up to 12 x 4 m. An electric motor is a standard. For operations by crank, a gear without endstop is used.

Hood profile

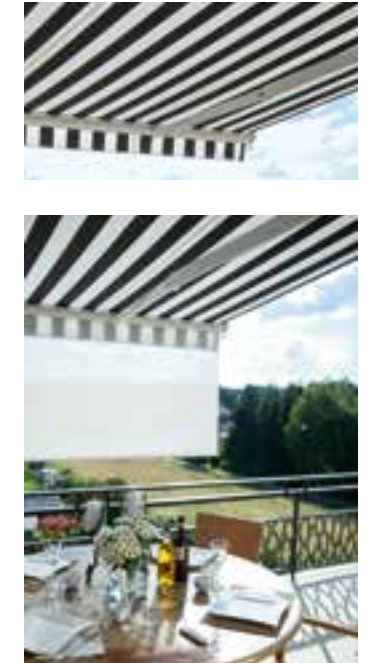

The hood profile that adapts. If the folding arm awning is mounted in an unprotected location, the retracted fabric will be exposed to wind and weather. In this case you can take effective precautions with the patented adjustable hood profile system. The hood profile can be adjusted to fit the set awning

incline. The fabric is effectively protected up to an arm incline of 70 degrees, providing better protection than a conventional, fixed hood profile. For coupled systems, the CAPRI is supplied only with a fixed hood profile.

CAPRI VARIO-VOLANT

More shade – more space – more awning, thanks to the valance

With the CAPRI VARIO-VOLANT, you are doing everything right. An awning that can do everything, but at an impressive price-performance ratio. Quality is paramount. The CAPRI with VARIO-VOLANT valance is fitted with the proven Leiner tilting joint as standard, allowing a maximum projection of 4 m.

Specially hardened components ensure maximum safety. The VARIO-VOLANT valance can be operated by crank or, for added convenience, by remote control. The fabric is elegantly protected from the effects of weather with the patented adjustable hood profile.

The VARIO-VOLANT valance can also be supplied with a radio-controlled motor.

LEINER LOUNGE COLOURS

Frame colour to order: The CAPRI and the VENTURA TREND are available in 3 standard colours (RAL 9010, LEINER LOUNGE grey, LEINER LOUNGE dark grey). For an additional charge, both models can also be supplied in your preferred RAL colour or in one of the 16 other LEINER LOUNGE COLOURS.

- RAL 9010 pure white
- LEINER LOUNGE grey
- LEINER LOUNGE dark grey

VENTURA TREND

Awning in top form

Looking for a folding arm awning that meets every requirement?

With a VENTURA TREND, you're certainly making the right choice. Designed for maximum sizes, it offers the utmost in safety and stability. Specially hardened aluminium parts allow a projection of up to 4 m. The solid side bearings are demonstrating their safety also by their appearance. The extremely high-performance arm system keeps the awning fabric taut thanks to its special geometry. The awning can be inclined at an angle of between 0 and 90 degrees. This ensures perfect glare and privacy protection. Configure your awning from different front profiles and hood variants. It's modern design and many different equipment options make the VENTURA TREND the perfect awning – and at an attractive price-performance ratio.

Visible front profile

Concealed front profile

Classic hood profile

Patented adjustable hood profile

Convenient io radio control

LEINER folding arm awnings are fitted with an electric motor as standard. A crank mechanism can also be supplied on request. The awning can be remotely extended and retracted particularly elegantly with a radio-controlled motor.

Upgrade the radio-controlled motor with a 3D sensor. Fitted on the front profile, it reacts to movements of the awning and automatically retracts it if there is too much wind.

VENTURA TREND

VARIO-VOLANT

More shade – more privacy

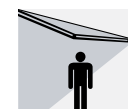

Steplessly adjustable – customized shade

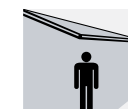

VARIO-VOLANT valances are the ideal addition to keep out prying eyes and low sunlight – especially on west-facing balconies and terraces. The fabric rolls up in the front profile and can be extended to any length. It is operated by a crank or, more elegantly, remotely using a radio-controlled motor. The specially hardened arm parts allow a maximum projection of 4 m.

Create your VARIO-VOLANT valance as you please

There are several fabric options to choose from. A "loose" weave makes it easier to see through the fabric, but still ensures privacy and offers a pleasant amount of light.

without VARIO-VOLANT valance

with VARIO-VOLANT valance

The VARIO-VOLANT valance can also be supplied with a radio-controlled motor.

TREND narrow awning

Fits into even the smallest gap

When there is limited space available, conventional awnings reach their limit. The narrow awning, is the right choice for those situations. With its crossing arms, the narrow awning offers more projection than width. The maximum projection of 4 m makes it the ideal solution when things get tight and an awning is indispensable. The TREND narrow awning is also available with a VARIO-VOLANT valance.

GARDA HK – the semi-cassette awning

Optimum protection

The large front profile delivers perfect protection for the awning fabric and the folding arms. Whether open or closed, the fresh design of the GARDA HK looks great on any style of building.

The proven LEINER tilting joint is fitted as standard to ensure a reliable closing action. The integrated high-impact brake offers safety and many years of precise functionality.

Atmosphere created by light

The indirect lighting from the folding arms illuminates the fabric of your GARDA HK awning, allowing the colour to create a harmonious atmosphere. The LED lighting can be dimmed steplessly by remote control.

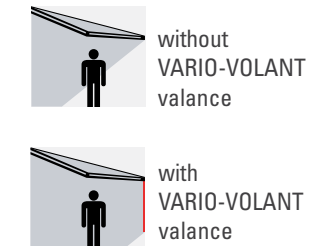

GARDA HK VARIO-VOLANT

A valance: more shade – more space – more awning

Customized adjustable – made-to-measure shade. VARIO-VOLANT valances are the ideal addition to keep out prying eyes and low sunlight – a must for west-facing balconies and terraces. The fabric rolls up in the front profile and can be extended to

any length. It is operated by a crank or, more elegantly, remotely using a radio-controlled motor. The specially hardened arm parts allow a maximum projection of 4 m. The GARDA HK can also be supplied as a coupled system.

Customise your VARIO-VOLANT valance, as you please

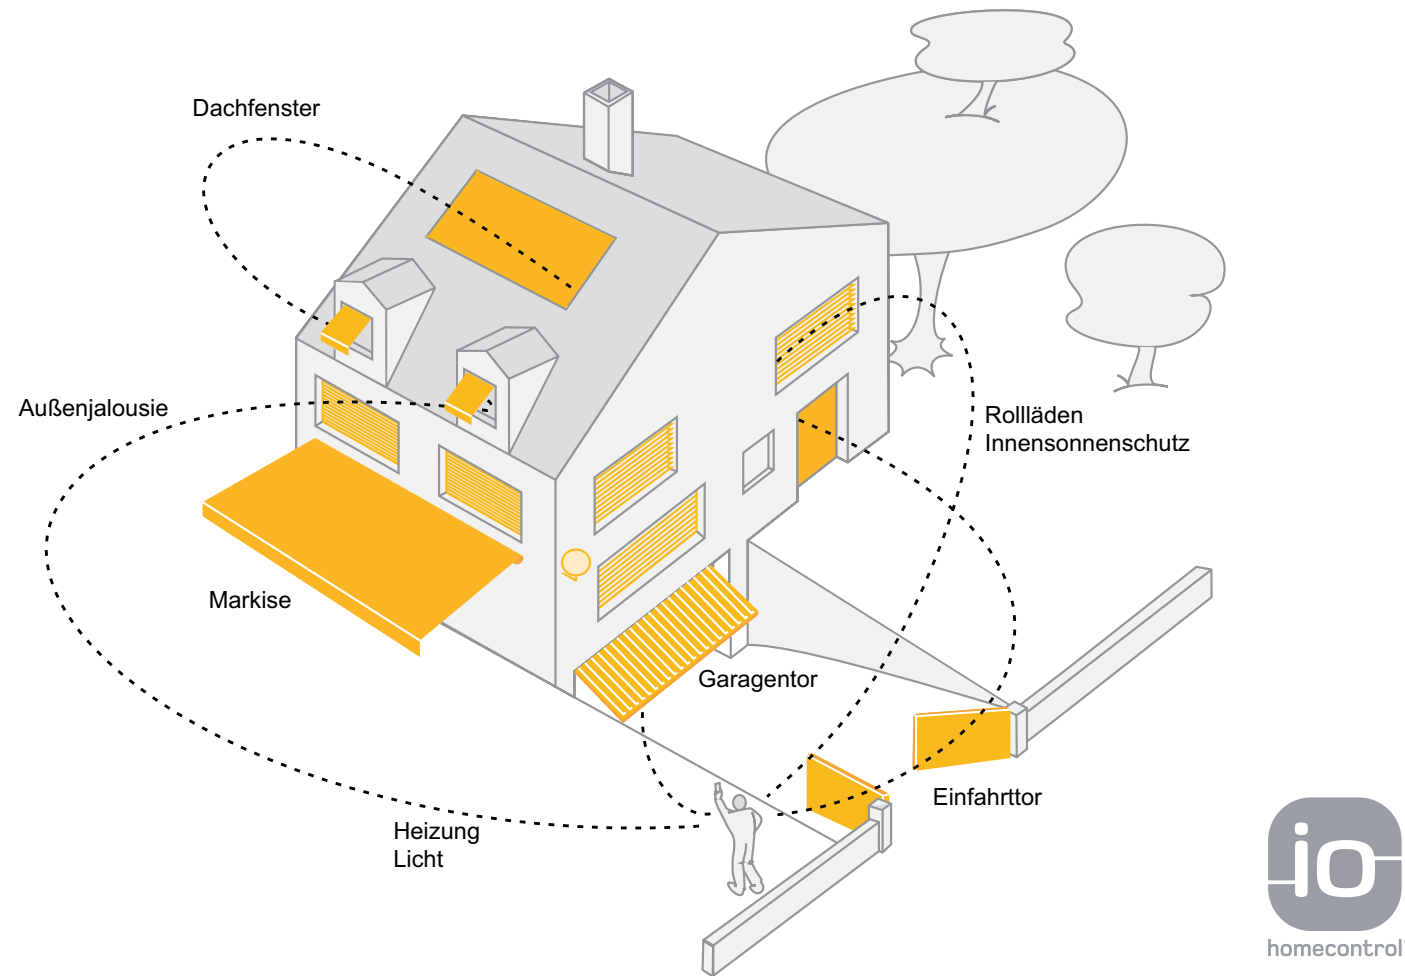

There are several fabric options to choose from. You can have the same fabric as the awning or opt for a more transparent type. The Tempotest Starscreen fabric can even be supplied in lengths of up to 3 m. The "loose" weave make it easier to see through the fabric, but still ensures privacy and offers a pleasant amount of light.

Tempotest Starscreen fabric, maximum height 3 m

SMART HOME READY

A home entirely to your liking

With "Smart Home Ready by Somfy", you have laid the foundation for your home of the future.

Essentially, you decide how "smartly" you want to control your home or flat. Ideally, you will start by defining the right basis that will allow you also to automate your domestic technology even further at a later date.

With the Somfy io solutions, you enjoy the convenience of smart home controls right from the start. That makes it easy for you to decide later how much more networking, convenience and security you want to have.

4 ADVANTAGES

- EASE OF OPERATION
- SECURITY
- COMFORT AND WELL-BEING
- ENERGY EFFICIENCY

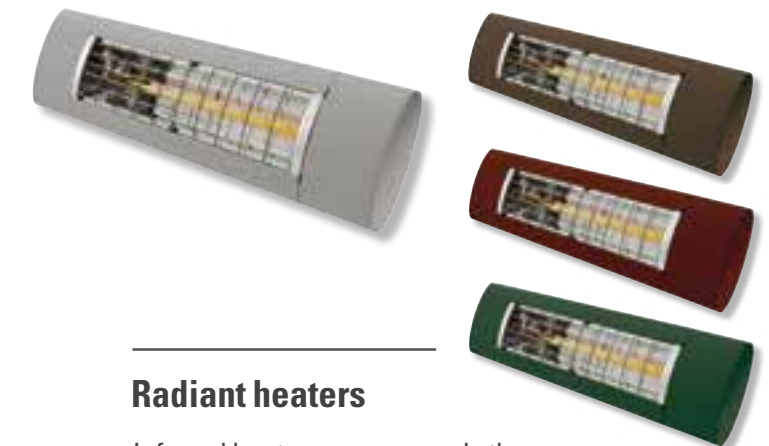

Choose the solution that's right for you and ask specialists for advice on other **smart home solutions**.

Why not integrate your sun and weather protection products into your smart home? After all, you can use the Somfy io radio control to operate your systems with lighting and/or radiant heaters easily by remote control or wall switches. Or even other control options such as a tablet or smartphone.

Convenient io radio control

Your awning can be remotely extended and retracted particularly elegantly with a radio-controlled motor. Choose from a variety of remote control and wall switch versions.

Radiant heaters

Infrared heaters warm up only the body and objects, not the air – making them cheap and effective. Available in 18 LEINER LOUNGE COLOURS and RAL 9010 for no additional charge.

WPS – Wind Protect System

Wind stability for your awning

Up to wind force 8 depending on the size of the awning. The Wind Protect System (WPS) was specially developed by LEINER for customers who do not want to retract their awning at the first sign of a breeze but would prefer to have the option of staying out on the terrace.

There are different options available – permanently installed or variably removable. The LEINER Wind Protect System (WPS) is simply fitted on the front profile of the awning, providing a quiet and pleasant shaded area – even in strong winds.

Caution: Do not combine the Wind Protect System WPS with an automatic sun and wind sensor!

Classic fabrics

For beautiful shades

It is only the combination of high-end technology and a weatherproof and quality fabric that makes the perfect shade. LEINER awning fabrics are known for their quality and elegance. Choose from an enormous bandwidth of attractive designs in the different LEINER colour worlds and a large number of special fabrics.

CALYPSO ROLL – side awning

Protection on the side

The CALYPSO ROLL side awning is the perfect companion to your awning on the terrace or balcony. It gives protection from sunlight coming in at the side, light wind and the prying eyes of neighbours.

The CALYPSO ROLL is easy to install, practical to use, and impresses with quality and elegance. Not only do the premium handles look good, they are also pleasant to the touch. They can also be supplied with a childproof lock on request.

SAFETY MOTION

Protection for your awning

The SAFETY MOTION emergency manual drive is the last-resort concept for your awning – should the radio-controlled motor does not work, the awning can be closed easily by crank at any time with the emergency manual drive.
